Principal's Desk

Dear Readers,

As you turn the pages of this month's newsletter, we find ourselves just emerging from the shimmering festival season — a time when homes glowed, hearts opened, and we celebrated not only prosperity, but the deeper truth that abundance reveals itself most truly when it becomes the cause of sharing. In our country, even as we ground ourselves in the philosophical conviction that happiness lies in the eternal and the contented self, our festivals invite the spirit of participation: of spending, giving and uplifting others — sometimes through things we might not strictly "need," yet find purpose in offering.

Our ancestors wove this idea into the very fabric of these celebrations: that true wealth is not hoarded but moved; that the well-to-do are nudged toward humility and responsibility, the under-privileged toward dignity and hope. In doing so, these multiple festivals strengthen the foundations of coexistence.

When E. M. Forster visited India in 1912-13, he observed the complex interplay of awe, misunderstanding and human inter-relation that colonial India presented. He recorded India as in many ways mysterious, even bewildering — a land of layered rituals, beliefs, and cultural encounters — but to look at it merely as "a land of superstitions" is to misread the deeper reality. Rather, beneath the apparent "superstition," there lies a cosmology of mutual dependence: the rich recognizing their role in support, the less privileged forging strength and community.

Our own school was immersed in this spirit of light and togetherness this Diwali. Classrooms were decorated with diyas and vibrant lights, the corridors glowed, and the children felt the surge of collective identity that comes when we decorate, celebrate and belong to our Alma Mater as one.

As the glitter of festival lights slowly subsides, we now turn together with equal dedication to the next rhythms of our life: preparation for the Annual Sports Meet, the Post-Mid Term examinations and the upcoming Board Examinations. Students and teachers alike align their efforts, synchronised in purpose and hope.

Let this season remind each of us that light is not meant merely to dazzle, but to guide — not only the individual, but the community.

Warm regards,

A. Awasthi

Editors Speak

Dear Reader,

They say words have power, and we truly understood it after joining the editorial team. What began as a simple love for writing, soon turned into an incredible journey filled with creativity, teamwork and countless learning moments.

The journey of the Editorial Board commenced with a sacred oath-taking ceremony. All the aspiring students showed up with excitement and enthusiasm. In the contest everybody had written to their heart's content. With bated breath, everybody waited to know who was in, and when the results were announced, claps and wide smiles filled the air.

From that day on, our real journey began. We started brainstorming ideas, editing articles, learning that a lot of hard work goes behind every page. Being a member of the editorial board isn't just about writing, it's about listening, learning and letting words build bridges.

This issue incorporates a number of interesting topics like the 'Rangoli Competition' organised on the eve of Diwali and the special assemblies conducted on the significance of the festival of light. The special visit of the tiny tots to the science and IT labs and the library also find a mention, while PTMs do occupy their position in the newsletter strongly.

As the journey enters the month of October let's enjoy each and everything the students have done or achieved creating a positive stir all around.

Yours truly,
The Editorial Team

Diwali Lights Triumph over Darkness

Diwali is a cherished festival making our school shine brighter than ever. This year's celebrations felt extra special, focusing on bringing a timeless story of Lord Rama returning to Ayodhya from exile, and celebrating our vibrant culture.

The most captivating part was the special Ramlila enactment by our students, who, with beautiful costumes and amazing performances, took us back to Lord Rama's journey, his victory over evil, highlighting the importance of courage and kindness. The storytelling was made more interesting with music and exciting dance moves – particularly the folk dances.

It was inspiring to see many students work together for weeks to prepare for this day. A few visuals...

"May the lamps of Diwali brighten your life."

"Let your light shine this Diwali."

"Diwali reminds us that light will always conquer darkness."

"May the triumph of light over darkness be a metaphor for our path to success."

"May the light of divinity spark your home with prosperity, abundance, and togetherness."

Rangoli Competition-2025

"Every Rangoli tells a story of tradition and celebration."

Diwali brings with itself light and many hues of life. It inspires us to clean one's inner self and welcome the light which washes the heart with its rainbow glitter. It expresses itself in the form of lighting diyas and blazing up the sky with crackers.

It also takes an artistic shape in the form of rangolis which is a traditional art practiced in India for ages.

This month witnessed OMK organising Rangoli

Competition for the Middle School students. The students, filled with artistic fervour buckled up for showing their skills on the assigned floors. Within no time, the entire stipulated area was full of fantastic patterns which radiated originality and talent.

In the same course, the classrooms and the class-doors were also decorated showcasing the spirit of the festival of light. Have a glimpse of the event in these expressive images...

"Let your Rangoli speak volumes about your festive spirit."

Tiny Tots on Way to the Home of Books and Technology

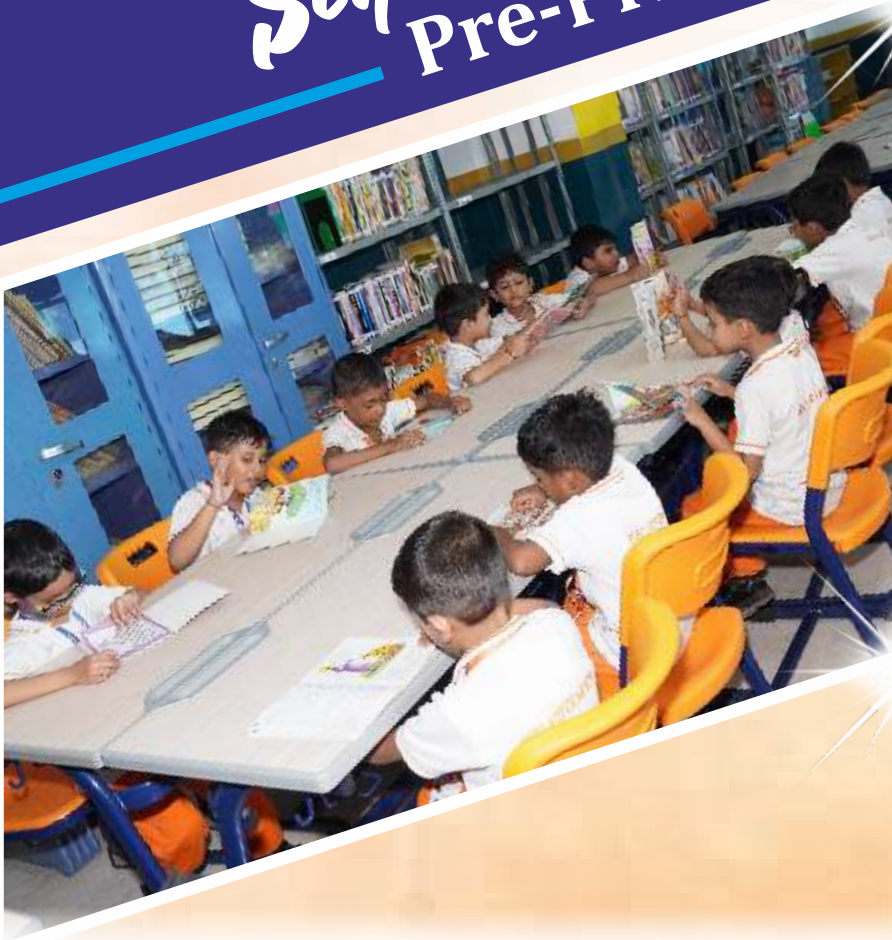

Children are the future of our nation, and it is our responsibility to nourish them intellectually. Following this belief, OMK's tiny tots made their way to the library and the ICT and Science laboratories, enhancing knowledge with glee and creativity.

It was interesting to see that some of them chose their way to science and technology, whereas the others opted for learning through books and artistic objectives. They experimented with the keypads and flipped the pages of the books. This small experience acquainted them with the nuances of technology as well as traditional education.

At last, having treasured the joy of a memorable day in their hat, they waved back to their homes. It was pleasant to see them hob-nob with machines and the books.

School Visit by Pre-Primary

"You always pass failure on the way to success." – Mickey Rooney

"Make each day your masterpiece." – John Wooden

PTM

Parent Teacher Meets are much more than scheduled conversations. They are the pivotal moments where the schools and the families come together to discuss each child's growth. The PTM conducted by our school offers a unique opportunity to exchange perspectives. Subject educators share the report of the academic progress, classroom behavior and learning strategies, while the parents provide insights into a student's habits, challenges, and personal development beyond the marks obtained by the students.

It is pleasant to see both the stakeholders of the child's future – the parents and the teachers – coming together on a platform provided by the school to propel them or her towards their greatest potential. Thus PTMs at OMK are the festivals of growth and exploration.

"Teachers light the way, but parents guide the steps, together, they shape a child's future".

"Strong partnerships between parents and teachers lead to strong, confident students".

"Collaboration between home and school is the key to unlocking a child's full potential".

"Together may we give our children the roots to grow and the wings to fly".

"When parents and teachers share a vision, students achieve their dreams".

Workshop *for the Transport Team*

By

TATA MOTORS

"Anyone Can Drive A Car But It Takes Someone Special to Drive a School Bus!"

In every institution, the transport team is its nerve, the healthier and the more aware it is, the better and the safer is the circulation of students between home and school. A well-trained transport team saves time, brings greater efficiency to the entire commuting system, and

enhances the level of experience of the students.

Keeping in view all this, a workshop was organized by an eminent organization Tata Motors. Mr Rakesh Kumar GM (Service) was the chief guest, while Mr Shashi Kumar, the programme coordinator also paid a visit. Mr Mirja Hashmi trained the OMK transporters.

The emphasis was on acquainting the transport staff with the subtle nuances of the entire operation they handle every day. They were informed about the dos and don'ts for them while dealing with the students, the better ways to take care of them and how to enhance the safety of the vehicle as well as the passengers. A few glimpses.

Only A School Bus Driver Would Turn Their Back On A Bus Load Of Kids!

Student's Assemblies

Diwali, in itself, is a special occasion, for it reiterates man's claim to register the victory of light over evil. Lamps are lit, houses and compounds are decorated symbolizing the welcome the people of Ayodhya offered to their exiled prince, Rama.

At OMK, Diwali means many events celebrating the spirit of the festival. The students enhance the experience further with their special assemblies.

This year too students a cross all sections of Grades 5 and Grade 4 lit up the stage with their presentations on topics like 'Celebrating Diwali the Earth Friendly Way' 'Brightening Lives with Noble Acts' and 'Education Is No Less than Light'. The audience was mesmerized to see the young ones performing without fear or hesitation.

"The only limit to our realisation of tomorrow will be our doubts of today."

"Success is not final, failure is not fatal: It is the courage to continue that counts."

Teacher's Assemblies

"A teacher affects eternity; he can never tell where his influence stops," by Henry Adams.

ARYABHATTA GANIT CHALLENGE

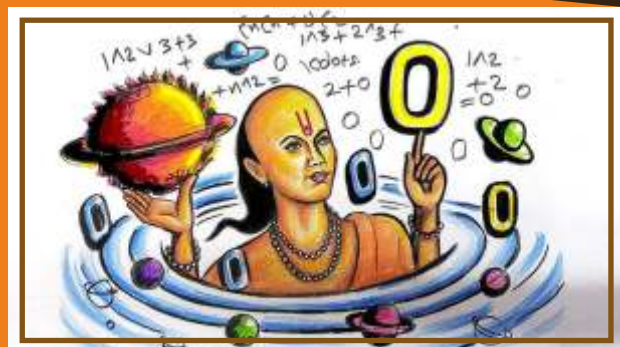

2025

Maths represents the left side of your brain which relates to reasoning, calculation and a scientific temperament. Maths pervades in every walk of life. That's why, it becomes very important for all of us. India has been a nursery of great mathematicians here. Aryabhata is one of these wizards. To celebrate his contribution to mathematics, the students of OMK take 'Aryabhata Ganit Challenge' every year. This year too several students exercised their intelligence in the context, but three of the meritorious students got selected for the second round of the challenge. Their excitement knew no bounds. Have a look at these visuals...

"Mathematics is the most beautiful and most powerful creation of the human spirit." — Stefan Banach

"Mathematics is the music of reason." — James Joseph Sylvester

Exceptional Performers of the Month

October 2025

We are delighted to announce our “Exceptional Performers of the Month” for their outstanding contributions to student learning and development!

Mr. Vivek Kumar

for maintaining proper attendance record on regular basis

Congratulations to all our awardees! Your dedication and hard work have made a significant impact on our students and school community.
